

KEY PROBLEMS

Key problems to discuss at the Ukraine-Poland Forum of Association of Rectors of Higher Technical Educational Institutions of Ukraine and Conference of Rectors of Technical Universities of Republic of Poland "Technical Education - for the future of Europe":

1. Guarantees of higher technical education quality.

European accreditation of technical universities specialties. Experience of Republic of Poland.

2. Connection between technical universities and industry in defining modern requirements to the European model of an engineer.

3. International dimensions of research.

Priority directions of joint projects of scientists from Ukraine and Republic of Poland to participate in competitions for EU programs, in particular, - Horizon 2020 and ERASMUS+.

4. Innovative orientation of scientific and technological cooperation of scientists from technical universities of Republic of Poland and Ukraine.

5. Cooperation of student's organizations and European mobility.
